**Subject:** RE: Sirenusa Condo Methyl Bromide Release 3/24/15 Update

Paul, Geoff and Cris can probably provide better information but you are correct the interview was conducted with the manager of the condo complex. We have received different information from several different parties and agencies including DPNR. We believe that there was some Methyl Bromide applications on 10/14/14 on unoccupied units, and that there was an additional application conducted on 3/18/15 on an unoccupied unit. I will run down this information today and report out up to date and more accurate information.

At some point today Paul Kahn and I (working from the REOC in Edison) would like to discuss some issues with ORC. I think at a minimum we would like yourself, Jim Doyle and Bruce Aber present. Could you let us know what your availability is?
